Dear Mr. Franks.

It was a great pleasure to have collaborated with your team on the design and fabrication of three new CIP skids as well as all the spray devices for the entire Genentech Oceanside Purification Expansion project. I would like to recognize and thank your team for providing us with quality craftsmanship, and outstanding customer service, particularly the support we received during the CIP skid Factory Acceptance Test, which was well beyond our own expectations.

ESC has a genuine understanding of the GMP nature of their products, including at the shop level. Throughout the project, ESC has given us invaluable improvement suggestions, maintained an aggressive schedule, while being patient and very responsive with our change requests. To complete the experience, ESC was very thorough in accurately and completely assembling the somewhat demanding Genentech Turn Over Package.

Congratulations on another job well done. As always, it has been an enjoyable and satisfying experience to collaborate with you. ESC with its experience and talent, without a doubt is the leader in this space.

We truly look forward to future opportunities to work together.

Tim Chen
Sr. Process Engineer
Genentech Oceanside Operations
